

Project Initialization and Planning Phase

Date	27 June 2026
Team ID	
Project Name	Rising water
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement):

Problem Statement (PS)	I am (Customer)	I 'm trying to	But	Because	Which makes me feel
PS-1	Government Disaster Management Official	Issue timely, data driven evacuation orders for vulnerable regions	Current predictive models lack high frequency precision and rely heavily on lagging indicators	Real-time climatic and precipitation data is not synthesized effectively in legacy systems	Extremely anxious about potential loss of life and delayed emergency response
PS-2	Agricultural Farmer	Protect seasonal crops and livestock from sudden, devastating inundations	Traditional weather forecasts only provide generic rainfall probabilities without localized flood risk classification	Existing meteorological platforms do not correlate granular soil moisture and specific seasonal rainfall data	Financially insecure and helpless against unpredictable, extreme weather events
